CERTIFICATE

OF UNIQUENESS

CLEAN AIR®

To whom it may concern

**Technologie Institut Medizin GmbH (TIM),
August - Thyssen - Str. 30, 56070 Koblenz, Germany**

herewith declares under own responsibility as the legal manufacturer that the ORS Clean Air is currently the only product of its kind on the market that provides a passive patient gas disposal system for operation with the vacuum system of a medical facility.

Product identification: CA-01
CA-02
CA-04

Device Trade Name: CleanAir

Product description: Open reservoir scavenger (ORS)

The purpose of an ORS Clean Air is to collect and dispose off patient gases from the expiratory outlet of an application device (e.g. an intensive care ventilator) in order to minimize the exposure of the environment and personnel to these patient gases.

At the same time, the ORS Clean Air prevents the expiratory side of the application device (e.g. anesthesia device, ventilator, etc.) from being impaired by the vacuum suction and thus serves to protect the patient.

Koblenz, January 2022
